Title:

MANIPULATION OF ZOMBIE FILES AND EVIL-TWIN FILES

Document Type and Number:
European Patent EP1311948
Link to this page:
http://www.freepatentsonline.com/EP1311948.html
Abstract:

Abstract not available for EP1311948
Abstract of corresponding document: **US6751635**
A method and system for reliably performing extra-long operations in a reliable state-full system (such as a file system). The file system includes a separate portion of the file system reserved for files having extra-long operations in progress, including file deletion and file truncation. This separate portion of the file system is called the zombie file space; it includes a separate name space from the regular ("live") file system that is accessible to users, and is maintained as part of the file system when recording a consistency point.
